BRAHMANI

Get a quote

Power that keeps your work moving.

Brahmani designs, installs and maintains electrical and solar systems for homes, businesses and industry. One team from the first site survey to the last service visit.

Request a site visit

See what we do

Homes

Rooftop solar, wiring and backup power

Businesses

Shops, offices and commercial buildings

Industry

Plants, panels and substations

Everything between the grid and your switchboard

Four services, delivered by the same engineers who plan the job.

Solar installation

Rooftop and ground-mounted systems sized to your actual usage, with net metering paperwork handled.

Panels and distribution

LT and HT panel design, assembly and installation, tested before it leaves our workshop.

Industrial electrical works

Cabling, earthing, lighting and power systems for factories, warehouses and

Cabling, earthing, lighting and power systems for factories, warehouses and commercial sites.

Maintenance contracts

Scheduled inspections, thermography and fast fault response so small issues stay small.

How a project runs

Clear stages, a named engineer on each one, and no surprises on the invoice.

1

Survey

We visit the site, read your bills and measure the load.

2

Design

You get a drawing, a fixed quote and a timeline.

3

Install

Certified crews build it safely and tidy up after.

4

Support

We commission, train your team and stay on call.

Tell us what needs power.

Share your site and load. An engineer will call within one working day with next steps.
